Experience

Fleksa

Dec 2023 – Feb 2024

Android Developer Intern

Remote

- During the internship period, **Fastlane software** is used to **automate updates** for **626 applications** and also helps in the **smooth deployment** processes in the **Play Store Console**
- Updated restaurant applications** by solving all the **bugs** while collaborating with a dynamic team to ensure **Play Store** compliance and enable **successful launches**

Nessviews

Jun 2023 – Aug 2023

Android Developer Intern

Remote

- Developed and successfully implemented a variety of **architectural techniques** to create powerful **search functionality** for the **Nessviews app** utilizing the **Bloc Pattern** as **state management**
- worked with **cross-functional** teams to successfully manage the integration of new **features—like Follow and Following buttons—**as well as some **significant UI changes** in the program
- Improved the **functionality** of the program by connecting **external APIs with ease**, increasing its effectiveness as a **professional application** during the **internship period**

Projects

Ecommerce App | Node.js, Express.js, MongoDB, Flutter, Dart, APIs, RazorPay

- Contribute to **seamless shopping experiences**. Our platform has intuitive **cart management**, allowing users to smoothly **add, remove, and adjust product quantities**. With a simplified **login/sign-up** process via **email**, **creating an account becomes easy**, ensuring durability and **user-friendly navigation**
- Smooth e-commerce transactions without any problem and integrating **RazorPay payment gateway**, helping customers conveniently make **secure online purchases**
- Design and develop the entire backend infrastructure autonomously, with the help of **Node.js** and **Express.js** to smoothly handle **data storage utilizing MongoDB**, ensuring scalability and **better performance**

Chatkarlo | Flutter, Dart, Firebase, Getx, setState

- It adopts the **MVVM architecture** like **GetX** and **setState**, efficient code organization and promoting **maintainability** and increases the efficiency of App
- Integration of **Firebase** helps in **real-time messaging system**, **data management**, facilitating instantaneous communication for users

Achievements

- Solved more than **300 problems** on platforms like **Leetcode**, which helps in showcasing **consistency** - [Link](#)
- Achieved a **100/100 score** in a subject during the **12th-grade board examination**, showcasing exceptional academic dedication
- Flutter enthusiast** and **open source contributor** with a passion for **open-source collaboration**. contribution to **Hacktoberfest**, showcasing my skills through **6 impactful PRs**, and waiting for an opportunity to leverage my expertise in innovative tech projects

Education

UIETH, Panjab University

Aug 2021 - Aug 2025

Bachelor of Engineering in INFORMATION TECHNOLOGY (CGPA: 7.30 / 10.00)

Punjab, India

- Relevant Coursework:** Data Structures and Algorithms in C++, Operating System, Network Security and cryptography, DBMS, SQL, JAVA programming, Computer Networks

Technical Skills

Languages: Rust, Java, C++, C, python, Dart, HTML, CSS,

Technologies: Flutter, Express.js, Node.js, Android SDK, iOS SDK

Concepts: Operating System, Artificial Intelligence, Machine Learning, Neural Networks, RESTful APIs, Computer Networks, Algorithms, Data Structures, SQL, Database Management System, Cryptography, Networking
